Safety for You and Your Patients

Since 1979, Sengewald, as the only manufacturer for surgical draping systems from the laminating and converting process in Germany, has been developing innovative and user-friendly products. These allow more efficient procedures and make surgeries more prolific and safer. 23 million drapes and 4 million packs speak for themselves – and for us.

In the operating theatre every minute counts. With our Secu-Drape® brand, we offer you a variety of complete draping systems, single drapes in various material qualities, as well as protective clothing to facilitate surgery preparation. With Secu-Tray® you can in addition not only select from existing complete sets, but also compose your own surgical procedure pack – completely according to your own personal needs: As technological market leader, we have the professional competence and flexibility to respond quickly to changing market needs. According to your individual requirements, we combine first-class solutions with high application comfort. You are always welcome to seek advice from our experienced employees. Your need is our challenge, your satisfaction is our goal.

Quality "made in Germany" is our basic attitude which is lived anew every day.
Therefore, we focus on the entire production process to ensure compliance and continuous improvement of all product and hygiene standards – for your safety and the protection of your patients.

Last but not least, we care about sustainability. All materials used by Sengewald are 100% free of PVC, emollients and heavy metals.

The Premium Quality Material

Mediwell super strong – Symbiosis of comfort and functionality

The basic non-woven

- ✓ Pleasantly soft and extremely absorbent
- ✓ The typical orange skin structure binds fluids of over 6 times own weight

The protective film

- ✓ Perfect barrier against microbes
- ✓ Super soft and absolutely impermeable to fluids
- ✓ The patient remains dry and is safely protected from infections
- ✓ The film is extremely lightweight and nevertheless highly tear resistant

The patient layer

- ✓ The non-woven is especially soft and durable
- ✓ Thanks to the lamination technology with the tiny air cushions it lies even more pleasantly on the skin and provides maximum patient comfort

Custom Procedure Trays (CPT)

Custom-made solutions for your surgical application

Since more than 30 years Secu-Tray® systems from Sengewald combine individuality and standardisation in the OR: 4 million customer-specific packs leave our production facilities per year in more than 2,000 different configurations.

We are happy to support you from the initial consultation up to the adoption of your individual pack in the daily routine in the operating theatre. Alternatively packs can also be selected or modified from our catalogue. Thereby, every component contained in the tray can be tracked back – through this flexibility meets premium quality and absolute material safety.

Our effort – your profit:

- ✓ Competent support in defining the pack contents
- ✓ Indication related and individual composition
- ✓ Process standardisation
- ✓ Increase of efficiency in the OR
- ✓ Absolute cost transparency
- ✓ Less storage space requirement
- ✓ Minimisation of waste

Our products fulfil the highest requirements:
- ✓ High tensile strength
- ✓ High absorption capacity
- ✓ Impervious to bacteria and fluids
- ✓ PP non-woven for maximum patient comfort
- ✓ Latex-free

All multiple and single layer materials are also available in packs that can be completely individually compiled according to your requirements. So you are best prepared for complex interventions.

Our products thereby exceed all the requirements of EN 13795 and bear the CE label according to EC directive 94/92 EEC medical devices.

Multiple Layer

Mediwell

2 or 3-ply material combination; absorbent and impervious to bacteria and fluids, HP.

Uses: as back table covers or a sterile field, patient drapes for minor procedures with low fluid incidence, as a bottom drape.

Mediwell super

2 or 3-ply material combination; extremely high absorbent capacity, impervious to bacteria and fluids, HP.

Uses: as back table covers, patient drapes for medium to major procedures, as a bottom drape.

Mediwell super strong

3-ply material combination; extremly high absorbent capacity and highly tear resistant, impervious to bacteria and fluids, HP.
Uses: as patient drapes for medium to major procedures with high fluid incidence.

Mediwell absorb

2-ply material combination; as a reinforcement non-woven with high absorptive capacity, very great wet rub-resistance, impervious to bacteria and fluids, HP.
Uses: as a reinforcement for angiography drapes and mayo stand covers as well as for custom drapes for procedures with a very high fluid incidence and/or subject to extremely great demands, also available as freely applicable adhesive drapes.

aquamarine

2 or 3-ply material combination; very absorbent and exceedingly tear resistant, impervious to bacteria and fluids, HP.

Uses: as back table covers, patient drapes for all procedures.

Single-Ply

Mediwell soft

Soft non-woven material, particularly similar to textiles; low-linting, alcohol and fluid-repellent, breathable, very comfortable to wear, SP.
Uses: as a patient drape for ophthalmic surgery, scrub suits, jackets and OR gowns.

Mediwell light

Light SMMMS non-woven; alcohol and fluid-repellent, breathable, comfortable to wear, SP.

Uses: as a patient drape for ophthalmic surgery, OR gowns.

Filmdrape

Contact transparency, micro-embossed, very drapeable PE film; impervious to bacteria and fluids, HP.

Uses: as a patient drape for minor and medium procedures in anaesthesia and ophthalmology.

Colordrape

Very drapeable PE coex film, impervious to bacteria and fluids, turquoise-coloured, HP.

**Uses:** special applications as patient drapes or as reinforcement in high-performance OR gowns.

HP: fulfils the requirements of EN 13795 for High Performance
SP: fulfils the requirements of EN 13795 for Standard Performance

Neurosurgery, ENT, OMS, Ophthalmology

The innovative neurosurgery drapes have a reinforced incision area and generous fluid collection pouch allows an effective fluid management.

The turban drape can be flexibly used in face surgery. Special eye and ENT drapes offer a user-friendly solution.
